

Did you know... About your Jungle Animache?

Its prey is numerous, its predator but one – and its spots go poof with age...

A **lion** cub is born with spots that disappear as it ages, and its only known predator is a Hyena. Lions will hunt by ambushing prey and typically at night in a group, also known as a 'Pride' of 4-6 lions.

Which animal boasts being the largest living land animal?

The **African Elephant!** With larger ears and tusks than their Asian cousins, the African Elephant can consume up to 50 gallons of water a day and will use their trunks to dig a hole in search of water. And if you think your tummy makes loads of noise, a female's tummy rumbles can be heard for miles!

ADOPTION CERTIFICATE

Do not forget to register your animal with the petit artisan Club so that it can be part of the Animache family.

To register your animal, you just need to complete the information card at the back and send it to us, or register on the petit artisan website on www.petitartisan.com

If you send us a drawing or a picture of your Animache toys you may also win some new animals to play with!

Animache Adoption certificate:

I have decorated my Animache animals and I have named them and Remember, your Animache enjoys going on adventures!
